

# ASTR 10 – Stellar Astronomy

Fall 2026

**Meeting times:** Mon/Wed, 1:30-3:45 pm

**Class locations:** Monday MLC 112, Wednesday PLT

**Instructor:** Caitlin Kepple (she/they)

**Contact:** Canvas Inbox Message preferred, or [kepplecaitlinmarie@fhda.edu](mailto:kepplecaitlinmarie@fhda.edu)

**In-person office hours:** Mon & Thurs 12-1pm in S55,

Mon & Tue 3:45-4:15pm in MLC 112

**Zoom office hours:** Thurs 12-1pm

Ever heard the phrase “*We are star stuff*”...?

In this class, we’ll explore exactly what Carl Sagan meant by this iconic statement many decades ago. Stellar Astronomy is about the stars and everything in between them. During our exploration of *star science*, we will investigate the current and historical understandings of stellar astronomy from a variety of perspectives. We’ll use real-world data to build knowledge and skills around astronomy as a science, while also interrogating the traditional view of science as an “objective” pursuit. We will also draw on knowledge from several disciplines and cultures to help us understand the forces that shape our view of science as individuals and broadly in the US.

## Course Learning Goals

Throughout this course, we will pursue the following set of skills related to studying astronomy:

- Appraise the benefits to society of astronomical research concerning stars and stellar systems.
- Evaluate the impact on Earth’s characteristics of the evolution of stars and stellar systems.
- Evaluate astronomical news items or theories about stellar astronomy based upon the scientific method.
- Describe ethical dilemmas arising out of contemporary scientific research and application from a variety of perspectives among local and/or global communities
- Understand and articulate the relevance and impact of astronomy research on an individual, community, and societal level
- Draw on and integrate lived experiences related to science to construct a shared understanding of astronomical knowledge and research

## Inclusivity Statement

As a starting point for creating a welcoming learning environment, we will refer to the [Inclusive Astronomy Recommendations](#) and actively work to improve on the practices they recommend. Materials in this course will strive to center the experiences of historically marginalized groups in astronomy using an intersectional lens. We will draw on different ways of knowing and learning astronomy, both historically and today. Additionally, we will work as a class to further identify how we are maintaining internalized biases about scientific knowledge and what perspectives are being left out of the conversation.

## Course Texts

- [Astronomy 2e, by OpenStax](#) (1<sup>st</sup> edition also okay, available in print for ~\$15)
- Stars and Galaxies, on Libretext (linked in Canvas)
- Selected readings available on Canvas each week

## Important College Dates

Oct 4: Last day to add classes, last day to drop w/no record

Nov 11: Veteran's Day Holiday (no classes)  
Nov 13: Last Day to withdraw ("W") from courses  
Nov 26-27: Thanksgiving Holiday (no classes)  
Dec 7-11: Final Exams (see the schedule below for this class specifically)

## Grade Breakdown

Grades are based on a combination of pre-class and in-class assignments, along with projects and final exam grades. The exact breakdown is below, and each category is described more in the next section. Notice that there is not one make-or-break assignment in this class. Instead, the grades are designed to show consistent participation and progress rather than ability to ace exams.

- Pre-Class Assignments (lowest 2 dropped) - 15%
- In-class Work (lowest 2 dropped) - 20%
- Cosmic Connections Presentation - 5%
- Wrap-up Quizzes - 20%
- Special Interest Project - 25%
- Final Exam - 15%

**Late work policy:** There is a 24-hour buffer period (no grade penalty) for assignments. If it is between 1-10 days late, there is a 5% penalty. For more than 10 days late, there is a 10% penalty. You can submit *almost* any assignment up until Friday of Week 11 at 11:59pm. *This is a hard cutoff date and will not be extended under any circumstances.*

**Grading Scale:** >97=A+, 93-96=A, 89-92=A-, 86-88=B+, 83-85=B, 79-82=B-, 76-78=C+, 69-75=C, 66-68=D+, 58-65=D, <58=non-passing. Grades rounded to nearest % at the end of the quarter.

## Course Structure

Our course is designed so that everyone can construct their astronomy knowledge from the ground up and access the material with a variety of learning styles, starting with short in-class assignments before moving on to the quizzes and special interest project. **For more details, rubrics, and make-up options for each item, see the Course Canvas page.**

### Pre-synchronous work – Videos, Reading, and Assignment (15%)

- o You can find the assigned videos and reading for each class session on Canvas (the schedule below is only tentative). As you complete the videos and readings, you should take notes and complete a brief assignment *before* coming to class. **Treat this as you would a homework assignment!**

### Cosmic Connections Presentation (5%)

- o Early in the quarter, you (or you and a partner) will sign up for a date to do a brief presentation that discusses a real-world example from the assigned reading/video topics. The main goal is to briefly remind others of the important topics and discuss an interesting application you found.

### In-class Activities (20%)

- o We will have in-class activities every class day (thus attendance is important!). These will mostly be submitted during class, though sometimes individually on Canvas. If you are absent, you can sometimes still complete these, though it is not guaranteed.

### Wrap-up Quizzes (20%)

- o Wrap-up Quizzes serve two purposes. 1: A low-stakes way to help you gauge your own progress with the material 2: They are your *best* reference in preparing for the final. Every 2-3 weeks, you'll complete a short quiz and have a peer grade it for you afterward. Then, you will note any

corrections to questions you missed and complete the rest of the assignment on Canvas. **Note that the first portion is completed while in class, and then submitted on Canvas by Friday night.**

### **Special Interest Project (25%)**

- o Throughout the quarter, you'll choose a couple of topics to learn more about and share with your classmates. The first project will be research-based, with pre-set topic options, focused on information literacy. The second, larger, project is very flexible and need only have some type of connection to our Stellar Astronomy class. More details to come.

### **Final Exam (15%)**

- o We will have one cumulative final exam at the end of the quarter during finals week. The format will be the same as quizzes, with multiple choice, fill in the blank, and short-answer style questions. You will need a calculator, which can be borrowed from the Campus Library's [Technology Lending Page](#).

## **Technology in class**

This course relies on Canvas and other online sources quite a bit while in class. Therefore, it is ideal if you have the ability to bring a laptop or tablet to class, but it is not required. If you are in need of a laptop for college, the De Anza [Library](#) offers single day or quarter-length lending options for laptops, tablets, and calculators.

## **Generative Artificial Intelligence Use and Academic Integrity**

I encourage every person reading this text to think about the implications of using generative artificial intelligence (AI) from multiple standpoints. **While it can be used as a tool for learning, there are ethical and educational considerations we should all take into account each time we use AI.**

There are certain points in the course I give the option for you to experiment with using AI as a tool to help you solidify your understanding of the material. Otherwise, I specifically discourage the use of AI to search for answers, write up assignments, or complete any portion of the work for you. **I specifically grade assignments assuming that you are human, and that the outcome will not be perfect from the get-go. I ask that you also allow yourself to make mistakes and take time to sit with new material.**

As your instructor, my priority is to give you ample space and time to grow your scientific literacy and knowledge—no matter where you are beginning from at the start of the quarter. Plagiarism or cheating explicitly violates De Anza's [Student Code of Conduct](#) guidelines and will result in a zero on that assignment, or further action if necessary.

There are several *free* resources at De Anza to provide extra support, to prevent cheating and plagiarism (listed below). Additionally, please do not hesitate to reach out to me if there is another way I can support your learning that has not already been made available.

## **Resources for this Class and Beyond**

### **Math, Science & Technology Resource Center**

De Anza's Math, Science & Technology Resource Center offers *free* [peer tutoring and workshops](#). Additionally, the [Student Success Center](#) provides help with general college skills, writing, Canvas, and much more. They have drop-in tutoring via Zoom, or Weekly Individual tutoring (see updates for this quarter's schedule on their website).

## Disability Access and Support

If you have registered with the [Disability Support Services](#) (DSS; located in RSS 141; [dss@deanza.edu](mailto:dss@deanza.edu)) or need alternate support for creating an accessible learning experience, please do not hesitate to communicate with me about this. DSS staff can meet with students, review the documentation of their disabilities, and discuss services that De Anza offers and any ADA accommodations for specific courses. Additionally, I will do whatever I can to ensure these needs are met during your time in my class.

## Pride Center

The De Anza Pride Center provides a safe, supportive and welcoming space for students across the gender and sexuality spectrum to build community, find resources and connect with the support needed to thrive in their college experience. You can visit the Pride Center at LIB 138 and see additional details about hours and points of contact on the [Pride website here](#).

## Student disclosures of sexual violence

De Anza College strives to foster a campus free of sexual violence including sexual harassment, domestic violence, dating violence, stalking, and/or any form of sex or gender discrimination. Please note, if you disclose a personal experience as a De Anza student, the course instructor is required to notify the Title IX Coordinator (Laureen Balducci).

***To disclose any such violence confidentially, contact the Title IX coordinator using the following forms or by phone at 408-864-8945***

- [Reporting Sexual Misconduct or Concern](#)
- [Contacts Page](#)

## Mental Health and Counseling Services

The De Anza [Mental Health and Wellness Center](#) provides a wide variety of counseling services for students or groups **free for students**. Please see their website for their current schedule and list of contacts. They can be contacted at 408-864-8868 or by emailing [mhwc@deanza.edu](mailto:mhwc@deanza.edu).

## Resources for Basic Needs

If you or someone you know are in need of housing assistance, food assistance, baby supplies and resources (along with many other services), the [Resources for Basic Needs page](#) has a wide range of support for De Anza students and family members.

## Academic Advising

For more general advice on setting up a study schedule, choosing a major/classes, and navigating other logistics of your degree, you can visit the [General Counseling Division](#). There are several other resources related to academics and other resources for De Anza students in this [General Resource Guide](#).

### Schedule\* of topics

| Week        | Topics                                                             | Reading                      | Important Notes           |
|-------------|--------------------------------------------------------------------|------------------------------|---------------------------|
| Week 1      | Day 1: Syllabus, Introduction to Astronomy                         | Syllabus                     |                           |
|             | Day 2: Units, Scientific notation, Night sky orientation           | **OS 1.3, 1.4, 1.6, 1.9, 2.1 |                           |
| Week 2      | Day 1: Analyzing Starlight – Colors and Spectra; Intro to Light    | OS 5.1, 17.1, Canvas Reading |                           |
|             | Day 2: Radiation and Spectra                                       | OS 5.2, 5.3, 17.2            |                           |
| Week 3      | Day 1: Light as a Particle; Stellar Classification, Doppler Shifts | OS 5.5-5.6                   | Weeks 1-2 Wrap-up         |
|             | Day 2: Stellar Classification                                      | 17.3, 17.4, Canvas Reading   |                           |
| Week 4      | Day 1: Telescopes Intro                                            | OS 6.1-6.3, Canvas Reading   |                           |
|             | Day 2: Ethics of Building Telescopes                               | OS 6.4, 6.5, Canvas Reading  |                           |
| Week 5      | Day 1: Intro to the Sun, Solar Activity and Space Weather          | OS 15.1-15.3, Canvas Reading | Weeks 3-4 Wrap-up         |
|             | Day 2: Powering the Sun, The Solar Interior; Article discussion    | OS 16.1, 16.3, 16.4          |                           |
| Week 6      | Day 1: Celestial Census – Masses and Diameters of Stars            | OS 18.1-18.2, Canvas Reading | Literacy Project Showcase |
|             | Day 2: Cosmic Distances                                            | OS 18.3, 18.4 & 19.2         |                           |
| Week 7      | Day 1: The H-R Diagram                                             | OS 19.3-19.4, Canvas Reading | Weeks 5-6 Wrap-up         |
|             | Day 2: Interstellar Space, Cosmic Materials                        | OS Ch. 20                    | SIP Idea Due              |
| Week 8      | Day 1: Stellar Beginnings and Evolution; Planetesimals             | OS 22.1-22.5                 |                           |
|             | Day 2: NO CLASS (Holiday)                                          |                              |                           |
| Week 9      | Day 1: Stellar Death and Supernovae, Neutron Stars                 | OS 23.1-23.6, Canvas Reading |                           |
|             | Day 2: Black Holes                                                 | OS 24.5-24.7                 | SIP Draft Due             |
| Week 10     | Day 1: The Milky Way, Galactic structure                           | OS 25.1-25.3, Canvas Reading | Weeks 7-9 Wrap-up         |
|             | Day 2: Galaxies and Discovery                                      | OS 25.5, 26.1, 26.2          |                           |
| Week 11     | Day 1: Galaxies, Project Presentations                             | OS 26.3-26.5                 | SIP Showcase              |
|             | Day 2: Structure and tour of the Universe, Final Exam Practice     | OS 28.3, 28.4, 29.5          | ALL LATE WORK DUE FRIDAY  |
| Finals Week | <b>Final Exam</b><br><b>Monday 12/7 1:45-3:45pm in MLC 112</b>     |                              |                           |

[Here is a Calendar to connect the weeks with the dates!](#)

**Student Learning Outcome(s):**

- Appraise the benefits to society of astronomical research concerning stars and stellar systems.
- Evaluate the impact on Earth's characteristics of the evolution of stars and stellar systems.
- Evaluate astronomical news items or theories about stellar astronomy based upon the scientific method.

**Office Hours:**

|                  |      |                    |
|------------------|------|--------------------|
| S-55             | M,TH | 12:00 PM - 1:00 PM |
| MLC 112 or S-46a | M,T  | 3:45 PM - 4:15 PM  |
