Lydia Hearn	Language Arts	English	Full-time tenured
The services for students building sub group  <i>Confirmed 5/16/2022</i>	I feel I would be a good candidate because I approach being a representative with a campus-wide view. My experience in shared governance as a past Academic Senate president and having served on several committees including the Facilities Committee, IPBT, College Council, just to name a few, prepare me to collaborate well with fellow committee members and assist in bringing more history and knowledge of college processes and effective student retention practices to the conversation. Most recently, as a former Guided Pathways co-coordinator and the current Title III grant project director, I am interested in efforts, including physical spaces on campus, that provide more opportunities for students to build community and access wrap-around services. My particular interest in serving on this committee is to envision how facilities, especially the new services for students building, can play a role in closing equity gaps. I believe diversity is very important on this committee because there are so many different populations of, entry points for, and goals of students on our campus that having many perspectives on the committee will help maximize our ability to represent our diverse student body.

De Anza Event Center subgroup	<p>1. I have worked in higher education for 25+ years and bring with me a broad range of experience and skills working in various areas of college life including student leadership development, residential education, diversity and social justice affairs, student conduct, and as a tenured faculty with a EdD in Educational Leadership.</p> <p>2. As we begin to build a new Event Center, it will be critical for the team to use a diversity framework so we can center our goals and objectives around our values of equity and inclusion. Every idea and decision should be vetted to ensure that we are thinking about issues of access, representation, and accountability. My hope is to bring that perspective to the committee.</p>
