## De Anza College Office of Institutional Research and Planning

To: De Anza Math Department
From: Mallory Newell, De Anza Researcher
Date: 4/20/2018
Subject: AB 705 Proposed Statistics and PreCalculus Recommendations Analysis
This analysis uses historical high school transcript data and De Anza math course enrollment between 2004 and 2015 to explore the percent of students who fall within each GPA range as might be recommended by the AB 705 Implementation Committee (shared as draft on 4/17/18). The courses enrolled represent the first course a student took, this is likely the course in which they placed, but enrollment data was provided rather than assessment data.

Statistics Recommendations - Non STEM Pathway
Table 1. Students by GPA Range Based on AB 705 Draft Recommendations

| High School Performance | Count | $\%$ | Recommended Support |
| :--- | ---: | ---: | ---: |
| HS GPA $\geq 3.0$ | 6,355 | $34 \%$ | Transfer-Level No Additional Support |
| HS GPA $\geq 2.3$ \& C or better | 3,961 | $21 \%$ | Transfer-Level No Additional Support |
| in HS Precalculus |  |  |  |
| HS GPA 2.3-3.0 | 5,023 | $27 \%$ | Transfer-Level Support Recommended |
| HS GPA $<2.3$ | 3,507 | 19\% Transfer-Level Support Strongly Recommended |  |
| Total | 18,846 | $100 \%$ |  |

GPA = High school unweighted cumulative GPA
Excludes any students who did not pass Algebra I in high school

- Of the students in the data file provided by CalPass Plus of students with high school transcript data who took a math class at De Anza:
- $34 \%$ had a GPA greater than or equal to 3.0 and would be placed into transfer-level Statistics with no support recommended
- $21 \%$ had a GPA greater than or equal to 2.3 and obtained a C or better in high school Precalculus (or a higher course) and would be placed into transfer-level Statistics with no support recommended
- $27 \%$ had a high school GPA between 2.3 and 3.0 and would be placed into transferlevel Statistics with corequisite support recommended
- $19 \%$ had a high school GPA less than 2.3 and would be placed into transfer-level Statistics with corequisite support strongly recommended

- Table 2 displays the GPA range of students and their first math course enrolled at De Anza College by level.
- $66 \%$ of students with $\geq 3.0$ enrolled in transfer-level math as their first course, however, $17 \%(1,068)$ enrolled in a degree applicable course, and $18 \%$ enrolled in a basic skills course, historically when using placement tests.
- $77 \%$ of students with a HS GPA and had a C or better in high school Precalculus enrolled in a transfer-level math course as their first course at De Anza, however 22\% enrolled below transfer-level.
- Students with a high school GPA between 21.3 and 3.0, 27\% enrolled at transfer-level as their first course.
- Students with less than a 2.3 high school GPA, only $10 \%$ enrolled at transfer-level as their first course.
