

**SYLLABUS FOR MATH 114 MPS, INTERMEDIATE ALGEBRA,
SPRING 2017**

MATH-114.–MP2, CRN: 01271

Instructor: Dr. Wyatt Howard

Email: howardwyatt@fhda.edu

Class Hours: Monday-Thursday from 1:30P.M.-3:45P.M. in E34.

Office Hours: Mondays from 11:30A.M.-12:30P.M. and Fridays from 11:30A.M.-1:30P.M. in F31a, and Thursdays from 12:20P.M.-1:20P.M. in S41.

Textbook: *Intermediate Algebra Student Workbook*, by Doli Bambhania, available in the bookstore. You will also need a graphing calculator for the class. I strongly recommend using the TI-83 or TI-84 (Plus and Silver versions are fine).

Grading:

- **Homework:** Homework will be assigned after almost every class and it will primarily come from the textbook (there is no online homework for this class). I will not collect all of your homework and grade each assignment. However, on exam days you need to bring **all** of your homework with you to class. I will collect 2 assignments on exam days. Before you take the exam, I will pick two of these assignments at random and you will turn them in when you are finished with your exam. I will not accept late homework. (Make sure your homework is stapled.) If you turn in the wrong homework assignment, then you will receive a zero for that assignment. It is your responsibility to make sure that you are organized and turn in the correct homework assignment. The homework will be graded on a scale of 1 – 5 where 5 is a perfect score. I will be primarily grading the homework on effort and to give you feedback.

- **Quizzes:** There will be a quiz almost every week (generally on Thursdays). I do not allow make up quizzes. If you miss a quiz, then your next quiz will count for double. You are only allowed to do this for one missed quiz. Any additional missed quizzes will count as a zero. In the calendar below, I have included the tentative dates of the quizzes. I will also give you the opportunity to retake your quiz **at the beginning of my Thursday and Friday office hours one week from the day that the quiz is handed back.**

Date: March 27, 2017.

You will redo the exercises you got wrong on a separate sheet of paper and be ready to present your solution to me during office hours. This is meant to give you personalized feedback on your work and help you prepare for the exam.

• **Tests:** There will be a total of 4 exams in the class: 3 midterms and 1 final. I do **not** give make up exams, with the possible exception of the final exam under extreme circumstances. In the event that you miss an exam, you will be permitted to replace the zero you received on **one** midterm exam by your final exam grade on a percentage equivalent basis. You will need to purchase a graphing calculator for the class. You are not allowed to use your phone as a calculator for the class. The final exam will be cumulative.

• **Attendance and Academic Etiquette:** Attendance is mandatory for this class. You will be given 20 points for attendance and academic etiquette for this course. These 20 points make up 10% of your overall grade. Students will lose one point for each unexcused absence and half of a point for a tardy (late by 5 or more minutes after class begins) or for leaving 5 or more minutes before class is excused. If you are have a valid excuse for why you are unable to attend class on a particular day, then you need to email me stating the reason for why you are absent, and based upon your email, I will decide if your absence is considered to be excused or not. Cell phones, computers, and any other devices are not allowed during class. If you are using one of these devices during class, then you will lose one point for each time that I see you using one of these devices. Disruptive behavior will not be tolerated, as well. If you are being disruptive and talking to another student during class, then you will lose a point for each incident.

Tentative Dates for Midterms: Midterm 1: Thursday, April 27th. Midterm 2: Thursday, May 18th. Midterm 3: Thursday, June 2nd.

Final Exam: The date of the final is exam is on Tuesday, June 27th from 1:45P.M.-3:45P.M. **The date of the final exam is set in stone** and will not be changed.

Attendance and Academic Etiquette 10%

Quizzes 5%

Midterm 1 15%

Midterm 2 20%

Midterm 3 20%

Final 30%

• **Grade Breakdown:**

90 – 100% = A.

80 – 89% = B.

70 – 79% = C.

60 – 69% = D.

below 60% = F.

Schedule for Math 114

	Mon	Tues	Wed	Thur	Fri	Sat	Sun
April	10: Classes begin	11	12	13	14	15	16
	17	18	19	20: Quiz 1	21	22: Last day to add	23: Last day to drop w/refund
	24	25	26	27: Exam 1	28: Last day for p/np	29	30
May	1	2	3	4	5	6	7
	8	9	10	11: Quiz 2	12	13	14
	15	16	17	18: Exam 2	19	20	21
	22	23	24	25	26	27	28
May/June	29: Memo- rial Day	30	31	1: Exam 3	2 Last day to drop with W	3	4
	5	6	7	8	9	10	11
	12	13	14	15: Quiz 3	16	17	18
	19	20	21	22	23	24	25
June/July	26	27: Fi- nal Exam 1:45P.M.- 3:45P.M.	28	29	30	1	2

This grading scale is not set entirely in stone. I may curve the class at the very end of the course, and letter grades will be determined by a curve at the instructor's discretion. It depends on how the entire class performs, but the above scale will be a good indication of how you are doing in the course.

Student Learning Outcomes:

- Evaluate real-world situations and distinguish between and apply exponential, logarithmic, rational, and discrete function models appropriately.
- Analyze, interpret, and communicate results of exponential, logarithmic, rational, and discrete models in a logical manner from four points of view-visual, formal, numerical, and written.

Course Description: Intermediate Algebra.

Prerequisites: Math 212 or equivalent with a grade of C or better; or qualifying score on the Math Placement Exam within the last calendar year.

Attendance: You are expected to be in class every day. If you have more than 10 recorded absences, you may be dropped from the course. However, it is your responsibility to drop yourself in the event that you want to drop the class.

Warm-Up Exercises: Warm-up exercises will be given almost everyday. This will consist of 1 – 3 exercises that I will post on the board and have you work on either by yourself or in groups when you enter class. After the first few minutes, I will walk around the class to observe how everyone is tackling the exercises and to provide help. These problems are intended to help warm-up your mind for the lecture that day. Please take them seriously.

Blue Books: Each student is required to purchase 3 small blue books and 1 large blue book and turn them in to me during the first two weeks of class. I will talk more about this on the first day of class.

Free Tutoring: The Math Tutoring Center in Room S4 and MPS Tutoring Center in S41 offers free tutoring on Mondays-Thursdays from 9 : 00A.M.-5 : 30P.M. I strongly encourage you to utilize this resource. More information can be found here:
<http://www.deanza.edu/studentsuccess/mstrc/>

Disability Support Services: If you need to contact the Disability Support Services, then please contact them as soon as possible. More information can be found here:
<https://www.deanza.edu/dss/>

Academic Integrity: This is pretty straightforward: Do not cheat on quizzes, exams, or directly copy other student's work. It is not worth getting caught and suffering the consequences. For more information about De Anza College's policy on academic integrity:
<https://www.deanza.edu/studenthandbook/academic-integrity.html>

Policies for This Class: These policies are part of the syllabus and will be strictly enforced. By enrolling in this course, you as the student agree to accept these policies and follow them and agree that **the instructor reserves the right to drop a student from the course with a W if any of the policies are violated.** Further action may also be taken against a student who violates specific policies, such as the policy on cheating.

- Cell phone use (talking on your phone, texting, etc.) during lecture is not allowed. This is considered to be rude behavior and tells me that you are not paying attention in class. If you are using your phone, then you will be warned once to stop. If it happens again, then you may be asked to leave the class and you will not be allowed back into the class until you have emailed the instructor or talked to him before the next class meeting.

If you have an emergency and need to use your cell phone, then you are free to excuse yourself from class to deal with the situation.

- Talking during class is also not allowed. This is also considered to be rude behavior, and it is distracting to the professor. If you are being disruptive and talking to another student during class, then I reserve the right to move you to the front of the classroom or I may

ask you to leave the class and you will not be allowed back until the class until you have emailed the instructor.

- Tests must be completed by the time class time ends. You will receive a two minute warning before your time is fully up. When time is over, you must put down your writing utensil and **stop writing immediately**. If you do not stop writing immediately, your test may **not** be collected and you may receive a grade of zero. Also, during exams everything must be off of your desk and either in your backpack (or under your seat if you do not have a backpack). If the instructor sees any phones, paper, notebooks, textbooks, etc. out during an exam, then it will be considered cheating and the student will receive a zero for that exam. If the instructor observes a student placing his or her hands beneath his or her desk for an extended period of time, the instructor may ask that student to stand up or move to another desk. If a student is observed with a cell phone in his or her hands, lap, or other easily accessible place after the student has received his or her test, that student will be considered cheating and will receive a zero on that test.
- If a student is caught cheating, the instructor reserves the right to assign a grade of F for the exam, which might lead to an F for the entire course. If a student is returned a graded test or quiz and the student changes his or her incorrect answers in order to receive more points, the student is considered cheating and such an act will carry the same consequences as those mentioned above.
