Math 10-64Z (27551) Introductory Statistics, Fall Quarter, 2023

Instructor Office Phone e-mail

Richard Lopez S44a 864-5661 lopezrichard@fhda.edu

Textbook: Introductory Statistics, by Barbara Illowsky and Susan Dean on

Openstax. Link: https://openstax.org/details/books/introductory-statistics

Materials: Webassign Homework & Test Taking System. This will be automatically

integrated into your De Anza Canvas page. We will use webassign to complete all assignments and tests. TI-83 or TI-84 graphing calculator!

Quizzes: Quizzes will be given approximately every week on Webassign and

usually <u>due on Sunday evenings.</u> Most quizzes will be approximately 3 to 8 questions. **No make-ups. Do not ask! Quizzes must be turned in on time or you will receive a 0.** Occasionally, you may be assigned group

work or group labs that will count toward your grade.

Homework: Homework is assigned for every section of the book and is expected to be

completed in a timely manner. All homework will be completed and turned

in on Webassign and have a due date and time.

Exams: Three in-class exams (taken on computer lab) will be given. **No make-**

ups, no exceptions! Exams must be turned in on time or you will

receive a 0. Exams will be approximately 20 questions.

Final Exam: A two-hour comprehensive final exam will be given which will include all

of the sections of the class. Finals must be taken on the day and time scheduled for the final, not before or after. Your final must be turned in on time or you will receive a 0. The final will be given in a computer

lab.

Attendance: This is an asynchronous class. You will work individually and are

expected to watch all class videos posted on Canvas to learn the material. However, it is <u>your</u> responsibility to drop yourself if you wish to drop the course. <u>The instructor will not automatically drop students who</u>

stop showing up to class.

Grades: Exams 50% of your grade

Quizzes & group assignments 10% of your grade Homework 15% of your grade Final exam 25% of your grade.

Your final grade is determined by your overall percentage of points obtained for all tests and assignments and then weighted as stated above. The final grade breakdowns will be as follows:

| [97,100] : "A+" | [93,97) : "A" | [90,93) : "A-" | [87,90) : "B- | ⊦" [83,87) : "B" |
|-------------------|----------------|----------------|------------------|------------------|
| [80,83): "B-" [77 | 7,80) : "C+" [| 70,77): "C" [6 | 60,70) : "D" I | Below 60% : "F |

Classroom Policies

- It is your responsibility to know the following policies for this class. These policies are part of the syllabus and will be strictly enforced. By enrolling in this course, you as the student agree to accept these policies and to follow them and agree that the instructor reserves the right to drop a student from the course with a W if any of the policies are violated. Further action may also be taken against a student who violates specific policies, such as the policy on cheating.
- 1. Any type of disruption committed during lecture is not allowed and disruptions will not be tolerated. Disruptions include but are not limited to: Talking during lecture; leaving the classroom during lecture; entering the classroom late in a way that disrupts the class. Disruptions such as these interfere with other students' ability to listen and learn. If you cause any disruptions during class, you will receive a warning both verbally and via email. If you cause a second disruption, you will receive a second and final warning. If you cause 3 disruptions during the quarter, you will be dropped form the course. Please be mindful of this rule. It is contained in writing in this syllabus and fully enforceable.
- 2. On test days, you may be assigned a seat by the instructor different from the one you are used to sitting in. If you talk or communicate with another student, you will be moved to another desk. Your desk must be free of any materials before receiving a test, which includes papers, purses, pencil holders, etc.
- 4. Restroom visits and other reasons for leaving the classroom during test and quizzes are not allowed. Arrangements for special cases, such as medical reasons, must be discussed with the instructor before a test or quiz starts.
- 5. During tests and quizzes, the instructor will walk around the room and closely observe the students. Please do not let this bother you. If anything appears in your lap, you will be asked to stand and remove any materials. All students must sit as far forward in the classroom as possible during tests and the final exam.
- 6. Once a test and quiz has been handed out, or while a test is being handed out, any kind of cell phone or other electronic device usage (such as texting, taking pictures, etc.) is not allowed. Students are required to turn off all electronic devices before any tests, quizzes, or the final exam is given and to not have their cell phone or electronic device in their lap. The instructor will walk around the room and closely observe students to make sure this rule is being followed. Please do not let this bother you. If the instructor observes a student placing his or her hands beneath his or her desk for an extended period of time, the instructor may ask that student to stand up or move to another desk. If a student is observed with a cell phone turned on in his or her hands, lap, or other easily accessible place after the student has received his or her test, that student will be considered cheating and will receive a 0 on that test, quiz, or final exam. If your phone rings or buzzes during a test, 5 points will be deducted from your score, so make sure your phone is turned off. Conversely,

if the instructor's cell phone rings or buzzes during a test, quiz, or final exam, every student in the class will receive **5 bonus points**.

- 7. Communication of any kind during a test or quiz between students or others is not allowed and is considered cheating. This includes any verbal, written or other communication, as well as any cell phone usage (including texting) or other electronic device usage. If a student uses any kind of text or notes (written or other) or electronic device during a test when permission is not strictly granted ahead of time, the student will be considered cheating. All tests and guizzes are to be the work of individual students only, unless stated otherwise (we will occasionally have "group" quizzes and other group work) Sharing, comparing or aiding in the formulation of test or quiz answers of any kind is considered cheating. If you have a question during a test or quiz, you are only allowed to talk to the instructor. If you are observed cheating on a midterm or guiz, you will receive a grade of 0 on that assignment and be reported to De Anza Administration. Also, if a student is caught cheating, the instructor reserves the right to assign a grade of F for the entire course or to drop the student with a W from the course. If a student is returned a graded test or quiz and the student changes his or her incorrect answers in order to receive more points, the student is considered cheating and such an act will carry the same consequences as those mentioned above. If you are caught cheating on the final exam, you will automatically receive a grade of F for the course.
- 8. **Withdrawals** (W's) can <u>no longer be given</u> by instructors past the withdrawal deadline. <u>Please be aware of this date</u>. If you wish to take a W for the class, the **student must do so** on or before the withdrawal date.
- 9. The purpose of office hours is for students to have time outside of class to be able to talk to the instructor for consultation. Office hours are <u>not</u> intended as a tutorial session for students or a place for students to complete their homework. Students who seek consultation during office hours will be attended to on an individual basis in wait rooms.

Reasons for office hours:

- a. The student needs to talk to the instructor about his or her grade, absences, assignments due, test taken, or anything related to his or her standing in the class.
- b. The student needs further explanation or clarification of material discussed in class, in the text, or in his or her notes.
- c. The student has a <u>clarification</u> question about a homework problem <u>after</u> the student has attempted the problem.
- d. The student wishes to discuss study skills, note taking skills, or anything that might enhance the performance of the student in the class.

Reasons **not** intended for office hours:

- a. To ask the instructor to work out an assigned homework problem for them or to work out a problem similar to a homework problem that wasn't assigned.
- b. To ask the instructor for extra credit or to change a class policy, or to ask the instructor to delay or reschedule a test or quiz.
- The class schedule given above is tentative and subject to change.

Misc.: All tests & quizzes are closed book, closed notes including the final exam. Please read the Classroom Policies for additional class rules. The final exam is scheduled for: Wednesday, December 13th.

Student Learning Outcome(s):

- Organize, analyze, and utilize appropriate methods to draw conclusions based on sample data by constructing and/or evaluating tables, graphs, and numerical measures of characteristics of data.
- Identify, evaluate, interpret and describe data distributions through the study of sampling distributions and probability theory.
- Collect data, interpret, compose and evaluate conjectures, and communicate the results of random data using statistical analyses such as interval and point estimates, hypothesis tests, and regression analysis.
