

Instructor: Hassan. Bourgoub
Course Name: Differential equations
CRN/Section 28688/17
Classroom: S16
Time: TTh: 6:30am-8:45pm.
Office Hours 9:30am-10:20pm, Room 47A
Email: Canvas Inbox for any class communication
Text: Differential Equations, By Dennis, G, Zill, 11th edition.

Course Content/Curriculum Outline

<http://ecms.deanza.edu/outlineprogresspublic.html?catalogID=2466>

PREREQUISITES

Deanza Math 001D with grade of C or better or the equivalent.

Attendance

TTh: 6:30am-8:45pm. Online. Zoom ID is available on Canvas Syllabus.

Ancillary Materials

Be sure to watch the videos on Web-assign when available, Canvas Modules, or any other media available, read the textbook on Web-assign site, notes posted on Canvas Modules before doing homework assignments. The textbook by far offers the best source of information and concept-based learning. Most videos only show you how to solve problems and lacks on principles and concepts. Overall Concept based learning is long lasting and takes a lot less time.

Web assigned Homework.

This part of the course is done on Web-assign website. You are to purchase an access code for web-assign with an e-book or web-assign bundled with a hard copy of a new textbook directly from the site or the Deanza Bookstore. If you make your purchase from the bookstore, be sure to purchase the 11th edition. You will be registered in web-assign by me and do not need class key; on the other hand, you will need to purchase an access code within the first two weeks of the quarter in the event that you do not have a multi term valid access code to the textbook assigned for the course.

If you have a Cengage account, log in to your account to see our course listed under the textbook. If you do not have a Cengage account, create an account first, using the email address you use on Deanza Myportal and your name as it appears on the Deanza site. Then you can access the class after you log in to your Cengage account.

All due dates for the assignments are set on the site and fixed to ensure uniform distribution of course load throughout the quarter. Each assignment comprises a number of homework

credits equal to the number of problems in the assignment. These credits will be scaled at the end of the quarter for a maximum of 100 course points, 25% of course grade.

Homework Extensions.

Only one extension for each assignment that expires in five days is allowed and it is done automatically on the site with 10% penalty. Do not ask for extensions on the site after extension time has expired. If you have some excruciating circumstances that warrant another extension, you need to contact me about the matter using Canvas Inbox.

All questions about HW problems are best addressed, after preparing for the assignment, during office hours and through Canvas email. Prepare for material covered in each assignment and allow ample time to work out the assignments and avoid last minute completion as it is not possible for many students to get the help they need in a very short amount of time and at an inconvenient time of the day.

Writing Exercises:

This part of classwork includes problem sets that cover sections studied in the Textbook. The problem sets are available on Canvas Assignments. I highly recommend that you work out these problems as they are intended to help students write during exams and quizzes. **These assignments are intended for your writing practice/review, and they are not to be turned in for credits.**

Testing

We are going to have three tests, three quizzes and a final exam. The tests are worth 50 points each, and the total number of points for the quizzes is 50, and the final exam counts for 100 points. There will be no makeup exams. The final exam will be comprehensive and mandatory. Dates for all tests and quizzes are available on the course schedule on Canvas Modules.

The final exam will be comprehensive and mandatory and counts for 100 points, 25% of course grade. The date and time for the final is available on Canvas Assignments and Modules,

Distribution of Course Points. (cpts)

Quizzes	50 cpts
Tests	150 cpts
Homework	100 cpts
Final Exam	100 cpts
<hr/>	
Total	400 cpts

Materials

The required text mentioned above, a TI84 calculator or the equivalent.

Academic Integrity

Refer to Schedule of Classes on college policy under subtitle Academic Integrity; in addition, cheating and plagiarism is not tolerated and will be decisively met with grade F for test/assignment, and, or dismissal from class depending on the circumstances.

Grading:

The course grade is based on the fixed scale below. Grades are not given to you; they are earned by your desire and willingness to be consistent, persistent, and hardworking. There are three components to the total grade in this course, in-class tests and Quizzes, homework, and a final exam. The Final letter grade is based on the scale below. [OBJ]

Grading Scale

Letter Grades	A+	A	A-	B+	B	B-	C+	C	D	F
Range In %	99-100%	94-97%	90-93%	87-89%	84-86%	80-83%	72-79%	65-71%	50-64%	Below 50%

Good Luck

Student Learning Outcome(s):

- Construct and evaluate differential equation models to solve application problems.
- Classify, solve and analyze differential equation problems by applying appropriate techniques and theory.

Office Hours:

M,T,W,TH	9:30 AM - 10:20 AM	S47A
M,W,T,TH	9:30 AM - 10:20 AM	Zoom
M,W	3:30 PM - 3:50 PM	Zoom
