

MATH D022
Discrete Mathematics Summer 2025
Asynchronous Online

Instructor: Fatemeh Yarahmadi

- The best way to contact me is through my email, yarahmadifatemeh@fhda.edu

Communication Plan

- Communication between instructor and student is very important. The best way to contact me is through Canvas and email. I will respond within 24 - 48 hours on weekdays, and on Monday for emails sent over the weekend. If I don't respond in that timeframe, please email me again.
- I always send out messages and announcements through Canvas. I would recommend checking your Canvas inbox daily, and if you can, download the Canvas app on your phone. I am very approachable so if you have any questions, please ask!

Course Description

This course explores elements of discrete mathematics with applications to computer science. Topics include methods of proof, mathematical induction, logic, sets, relations, graphs, combinatorics, and Boolean algebra.

Textbook & Required Materials:

Text: Epp, Susanna. Discrete Mathematics: **An Introduction to Mathematical Reasoning**, Brief Edition. Cengage Learning, 2011.

We will also sometimes use material or problems from several other discrete math books:

Discrete and Combinatorial Mathematics, 5th edition, by Ralph P. Grimaldi.

Discrete Mathematics and its Applications, 7th edition, by Kenneth Rosen.

Computer/smartphone to complete online exams and homework assignments, and submit activities on Canvas.

You should keep a **notebook** where you take notes and work the problems for reference.

Prerequisite:

MATH 32, 43 or 43H with a grade of C or better or equivalent, and CIS 22A or CIS 35A with a grade of C or better or equivalent.

Advisory: EWRT 211 and READ 211 (or LART 211), or ESL 272 and 273

Canvas:

All class content, assignments and announcements will be on Canvas, which you can access through MyPortal. The course will be divided into weekly modules in Canvas.

Group Activity:

There will be required group activities. Even though the problems will be discussed in group, write up your own solutions **independently**.

- **Every member** of the group will be taking a role.
- Your name and your role should be written at the top of the first page.
- Work must be NEAT and ORGANIZED. Do problems IN ORDER.

- It is important for you to **SHOW YOUR WORK!** You are graded on the work you show to get the final answer, not just the final answer. Be sure to show your “scratch work” that goes with the problem.

Discussions: There will be discussion topics posted throughout the term. The deadline for responding to the topic will be indicated when the assignment is posted. Submit your work on Canvas **independently**.

You may not respond to the discussion once the deadline has passed.

Homework:

Written sets for submission: During the term, I will send out homework and group activities sets to be discussed, written up, and submitted on Canvas. Homework and group activities is essential in any math class. You cannot expect to pass the class without putting consistent effort into homework and group activities. Show all work and explain any reasoning. Submit your work on Canvas **independently**.

You may not submit your assignments once the deadline has passed.

HW Guidelines:

The process of solving homework problems reflected in step-by-step solutions. The following are some specific criteria:

Guidelines for homework:

- Your name, class, and section number should be written at the top of the first page.
- Work must be NEAT and ORGANIZED. Write the questions (problems) IN ORDER. Following the format displayed on Canvas.
- It is important for you to **SHOW YOUR WORK!** You are graded on the work you show to get the final answer, not just the final answer. Be sure to show your “scratch work” that goes with the problem. All work you submit must be written up individually in your own words, and you shouldn't ever submit work that you wouldn't be comfortable explaining clearly to another student or to the instructor.
- Do your work underneath the assigned problem then circle your final answer.
- At the end of each homework assignment, write a brief “Chat” paragraph
 - A key component in learning is thinking about how and what you are learning. What are you doing that is working? What areas could you improve upon? What comes easily for you? Is there a pattern in your homework? At the end of each homework assignment, write a very brief paragraph about what you learned, what you feel you need to review, and any thoughts or feelings you have about the math you're doing. This is also a great opportunity for you to communicate with your instructor! There are no “right” answers. Be honest and use this as a learning process.

Even though the problems will be discussed in group, write up your own solutions **independently**.

Project: Project will be assigned throughout the term. Project due dates are indicated on Canvas. You may not submit your assignments once the deadline has passed. Submit your work on Canvas **independently**.

You may not submit your assignments once the deadline has passed.

Exam Reviews: There will be an exam review assigned before each exam. The purpose of the review is to aid the student in studying for the exams. You may not submit your assignments once the deadline has passed. Even though the problems will be discussed in group, write up your own solutions **independently**.

You may not submit your assignments once the deadline has passed.

Midterm Exams: There will be two midterm exams. Each midterm exam will focus the material covered since the previous exam. More details on exam dates and procedures can be found in Canvas.

You may not submit your assignments once the deadline has passed.

Final Exam: The final exam will cover all material from throughout the term. More details on the final exam will be available on Canvas.

Our exam instruction is as follow:

- Students need to have a camera on their computers.
- Students should have Zoom installed on their computers to take the exams.
- Students should record the exam based on the instructions posted on Canvas and upload the recorded video to their Google Drive (or any other cloud). Then share a link to the recorded video without an access code (Change the permission of the file to “Anyone with the link” on your Google Drive).
- After grading, students can delete the recorded videos from their Google Drive.
- Do not upload the videos to public platforms like YouTube.

More details on exam dates and procedures can be found in Canvas.

$$f^{-1}(A \cap B) = f^{-1}(A) \cap f^{-1}(B)$$

Definitions:

Let $f : X \rightarrow Y$ be any function, and let $A, B \subseteq Y$.

The **inverse image** of a set under f is defined as:

$$f^{-1}(S) = \{x \in X \mid f(x) \in S\}$$

We aim to prove:

$$f^{-1}(A \cap B) = f^{-1}(A) \cap f^{-1}(B)$$

Direction 1: $f^{-1}(A \cap B) \subseteq f^{-1}(A) \cap f^{-1}(B)$

Let $x \in f^{-1}(A \cap B)$.

Then by definition, $f(x) \in A \cap B$, so $f(x) \in A$ and $f(x) \in B$.

Therefore:

- $x \in f^{-1}(A)$
- $x \in f^{-1}(B)$

So $x \in f^{-1}(A) \cap f^{-1}(B)$.

$\therefore f^{-1}(A \cap B) \subseteq f^{-1}(A) \cap f^{-1}(B)$

Direction 2: $f^{-1}(A) \cap f^{-1}(B) \subseteq f^{-1}(A \cap B)$

Let $x \in f^{-1}(A) \cap f^{-1}(B)$.

Then:

- $x \in f^{-1}(A) \Rightarrow f(x) \in A$
- $x \in f^{-1}(B) \Rightarrow f(x) \in B$

So $f(x) \in A \cap B$, which means $x \in f^{-1}(A \cap B)$.

$\therefore f^{-1}(A) \cap f^{-1}(B) \subseteq f^{-1}(A \cap B)$

Final Conclusion:

$$f^{-1}(A \cap B) = f^{-1}(A) \cap f^{-1}(B)$$

This identity holds for all functions f , regardless of injectivity or surjectivity.

Grading Rubric (10 Points Total)

Category	Criteria	Points
1. Understanding of Definitions	Clearly defines $f^{-1}(S) = \{x \in X \mid f(x) \in S\}$. Shows understanding of inverse image.	1 pt
2. First Inclusion Proof	Correctly shows $f^{-1}(A \cap B) \subseteq f^{-1}(A) \cap f^{-1}(B)$. Uses precise logic and explanation.	3 pts
3. Second Inclusion Proof	Correctly shows $f^{-1}(A) \cap f^{-1}(B) \subseteq f^{-1}(A \cap B)$ using proper reasoning.	3 pts
4. Final Conclusion	Explicitly concludes that the sets are equal and the identity always holds.	1 pt
5. Clarity and Notation	Proof is well-written, logically structured, and uses correct symbols and terminology throughout.	2 pts

No makeups for the final can be provided. The final grade cannot be dropped.

For each exam, if the step by step solution is missing or your answer is not consistent with your step by step solution, you only receive **10% of the grade**.

Grading Policy:

Homework, Group Activities, and Discussion	200 pts (25%)
Projects and Presentation	100 pts (12.5%)
Midterm Reviews/ Midterms	300 pts (37.5%)
Final	200 pts (25%)
Total	800 pts

A	100%	to 94.5%
A-	< 94.5%	to 89.5%
B+	< 89.5%	to 86.5%
B	< 86.5%	to 83.5%
B-	< 83.5%	to 79.5%
C+	< 79.5%	to 74.5%
C	< 74.5%	to 69.5%
D+	< 69.5%	to 66.5%
D	< 66.5%	to 63.5%
D-	< 63.5%	to 59.5%
F	< 59.5%	to 0%

Important Dates and Deadlines: <http://www.deanza.edu/calendar/dates-and-deadlines.html>

De Anza Final exams schedule: <https://www.deanza.edu/calendar/final-exams.html>

For detailed information on Homework, Projects, Discussion please log into your Canvas course page.

Grade Changes

Grade changes are made only for clerical errors. I will not change grades for any other reason.

Important Notes:

There will be regular online homework, quizzes. You will have a limited amount of time to complete the quizzes, homework, and discussions.

Any late submissions are penalized at a rate of 10% per day.

No makeup quizzes will be given, even if the absence is excused. If you miss an quiz, you will receive a 0% on it.

Dropping

Students will not be automatically dropped for non-attendance. Although I do reserve the right to drop students for non-attendance, it is the student’s responsibility to officially drop or withdraw from the course – if you fail to do so and your name appears on the final roster, you will receive an F for the semester. Do not assume that I will drop you if you stop coming to class.

Academic Integrity:

All students are expected to exercise high levels of academic integrity throughout the quarter. You are encouraged to work together but you are expected to write up your answers independently. Any instances of cheating or plagiarism will result in disciplinary action, including getting a ‘0’ on the assignment and report to the PSME dean, which may lead to dismissal from the class or the college

Student Honesty Policy:

“Students are expected to exercise academic honesty and integrity. Violations such as cheating and plagiarism will result in disciplinary action which may include recommendation for dismissal.”

Disabled Services:

Students who have been found to be eligible for accommodations by Disability Support Services (DSS), please follow up to ensure that your accommodations have been authorized for the current quarter. If you are not registered with DSS and need accommodations, please go to <http://www.deanza.edu/dss>.

This syllabus is subject to change at the instructor's discretion. Changes will be announced in class and on Canvas.

Recipe for Success:

- If you ever have any questions, Email me! You are welcome to send email to me whenever you need help!
- Visit the Tutoring Center.
- Form a study group.
- Watch all lectures, participate in every discussion, and complete every homework assignment.
- Read the sections to be discussed in class prior to the lecture

Section	Course Content
Chapter 1	Speaking Mathematically
Chapter 2	The Logic of Compound Statements
Chapter 3	The Logic of Quantified Statements
Chapter 4	Elementary Number Theory and Methods of Proof
Chapter 5	Sequences, Mathematical Induction, and Recursion
Chapter 6	Set Theory
Chapter 7	Functions
Chapter 8	Relations
Chapter 9	Counting and Probability

Tentative Schedule**Week 1: Foundations of Logic and Language**

- **Chapter 1: Speaking Mathematically**
 - Mathematical language, sets, predicates, conditionals
 - **Chapter 2: The Logic of Compound Statements**
 - Truth tables, logical equivalence, implications, tautologies
 - **Start: Chapter 3: The Logic of Quantified Statements**
 - Quantifiers, negation, nested quantifiers
-

Week 2: Proofs and Number Theory

- **Finish Chapter 3: The Logic of Quantified Statements**
 - **Chapter 4: Elementary Number Theory and Methods of Proof**
 - Direct proof, proof by contrapositive, contradiction, counterexamples
 - Divisibility, primes, congruences
-

Week 3: Induction, Sequences, and Exam 1

- **Chapter 5: Sequences, Mathematical Induction, and Recursion**
 - Arithmetic/geometric sequences, recursive definitions
 - Mathematical induction, strong induction
 - **End of Week: Exam 1**
-

Week 4: Sets, Functions, and More Proof Practice

- **Chapter 6: Set Theory**
 - Set operations, power sets, Cartesian products, indexed families
- **Chapter 7: Functions**

- Injective, surjective, bijective, composition, inverses
-

Week 5: Relations, Counting, and Exam 2

- **Chapter 8: Relations**
 - Properties of relations (reflexive, symmetric, transitive), equivalence relations, partial orders
 - **Chapter 9: Counting and Probability**
 - Sum/product rules, permutations, combinations, pigeonhole, basic probability
 - **End of Week: Exam 2**
-

Week 6: Graphs, Trees, and Final Review

- **Chapter 10: Graphs and Trees**
 - Graph terminology, isomorphism, Euler/Hamilton circuits, trees, spanning trees
- Final Exam Review

Final Exam

Student Learning Outcome(s):

- Critique a mathematical statement for its truth value, defend choice by formulating a mathematical proof or constructing a counterexample.
- Analyze and apply patterns of discrete mathematical structures to demonstrate mathematical thinking.

Office Hours:
